Task 1

Q create an ec2 instance

Install a webserver (Nginx) Browse it using browser

steps:

step 1 Open EC2 Dashboard

step 2 Launch Instance

Click Launch Instance, now configure

step 3 select AMI - operating system

step 4 free tier instance type and generate a key pair and download .pem file

step 5 allow ssh and add http

After instance is running → Select instance → Click connect

open terminal and run these commands ;

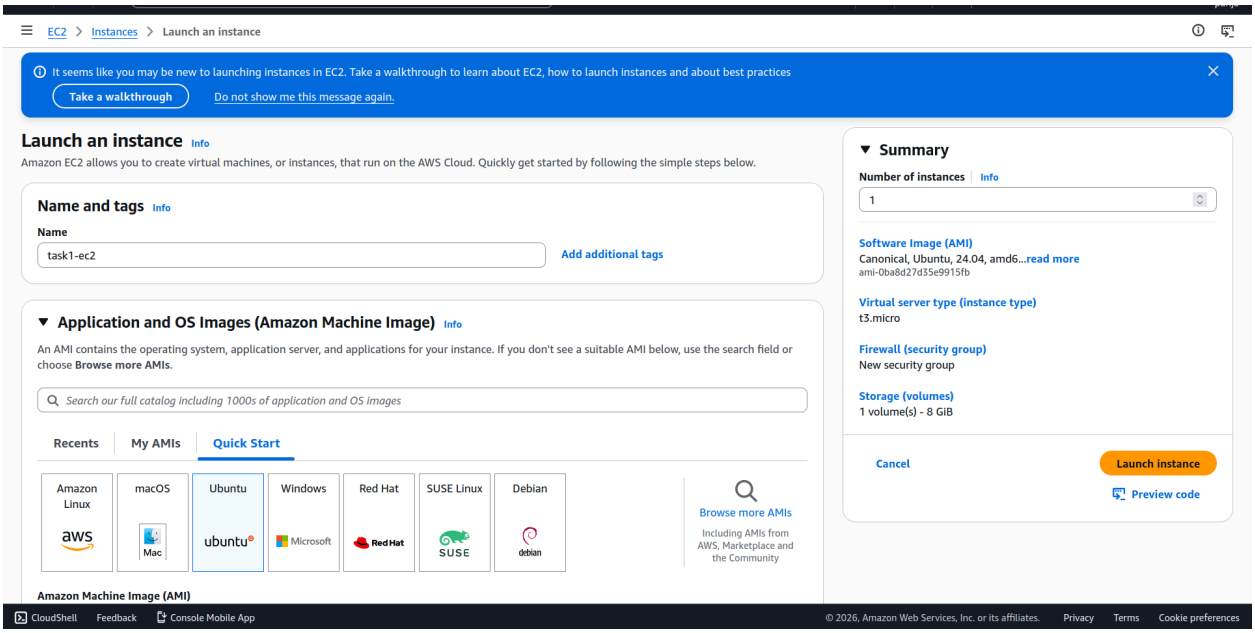
chmod 400 my-key.pem

ssh -i my-key.pem ubuntu@<Public-IP>

then install nginx using apt

Final step - test in browser

Open browser: http://<Public-IP>



EC2 > Instances > Launch an instance
It seems like you may be new to launching instances in EC2. Take a walkthrough to learn about EC2, how to launch instances and about best practices

Launch an instance Info
Amazon EC2 allows you to create virtual machines, or instances, that run on the AWS Cloud. Quickly get started by following the simple steps below.
Name and tags Info
Name
task1-ec2
Add additional tags
Application and OS Images (Amazon Machine Image) Info
An AMI contains the operating system, application server, and applications for your instance. If you don't see a suitable AMI below, use the search field or choose Browse more AMIs.
Search our full catalog including 1000s of application and OS images

Firewall (security groups) Info
A security group is a set of firewall rules that control the traffic for your instance. Add rules to allow specific traffic to reach your instance.
Create security group
Select existing security group
We'll create a new security group called 'launch-wizard-16' with the following rules:
Allow SSH traffic from
Helps you connect to your instance
Anywhere
0.0.0.0/0
Allow HTTPS traffic from the internet
To set up an endpoint, for example when creating a web server
Allow HTTP traffic from the internet
To set up an endpoint, for example when creating a web server
Rules with source of 0.0.0.0/0 allow all IP addresses to access your instance. We recommend setting security group rules to allow access from known IP addresses only.
