task 4

Create ec2 instance, create some files/dir

Capture snapshot of ebs volume

Create a new ebs vol from that snapshot

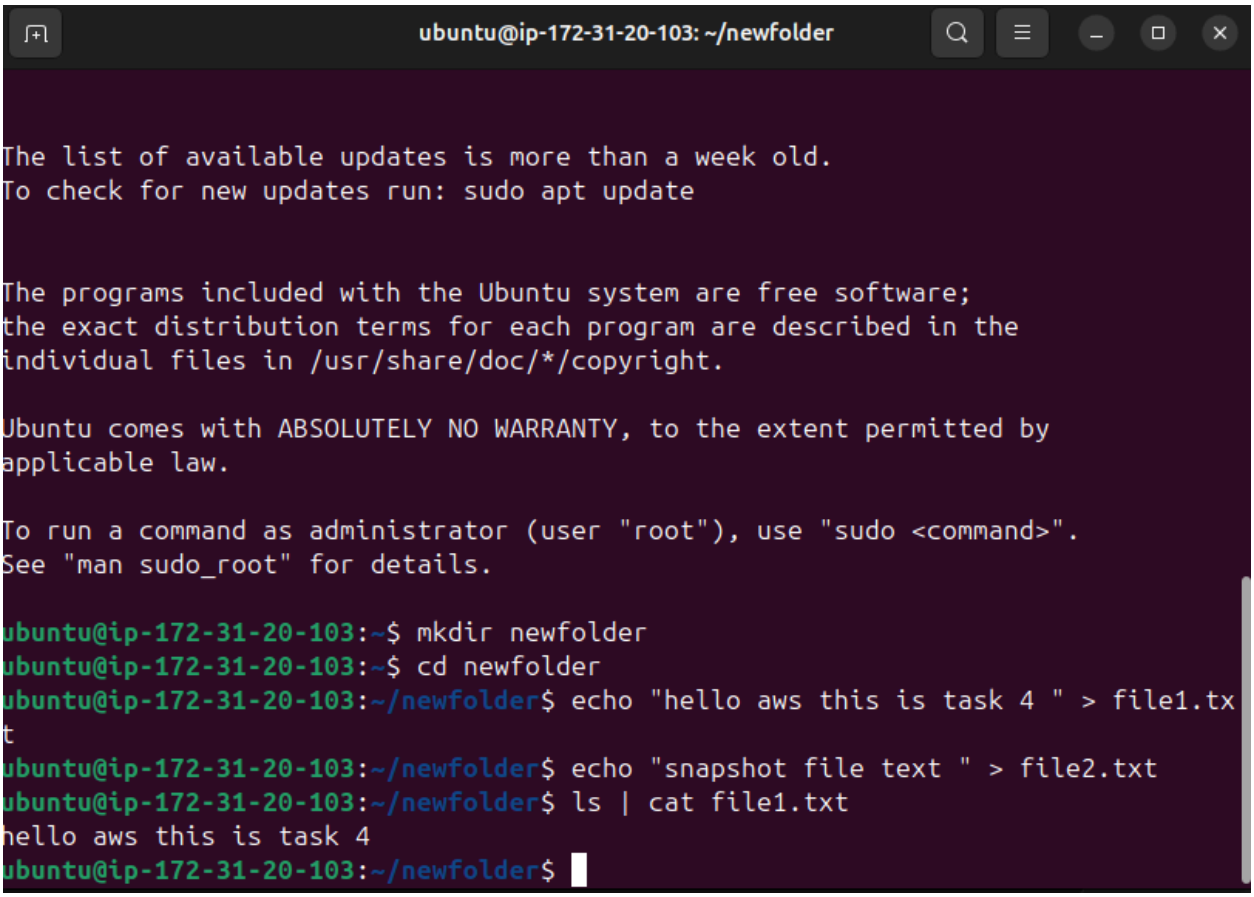
Attach it to ec2 instance

See it the files still exist

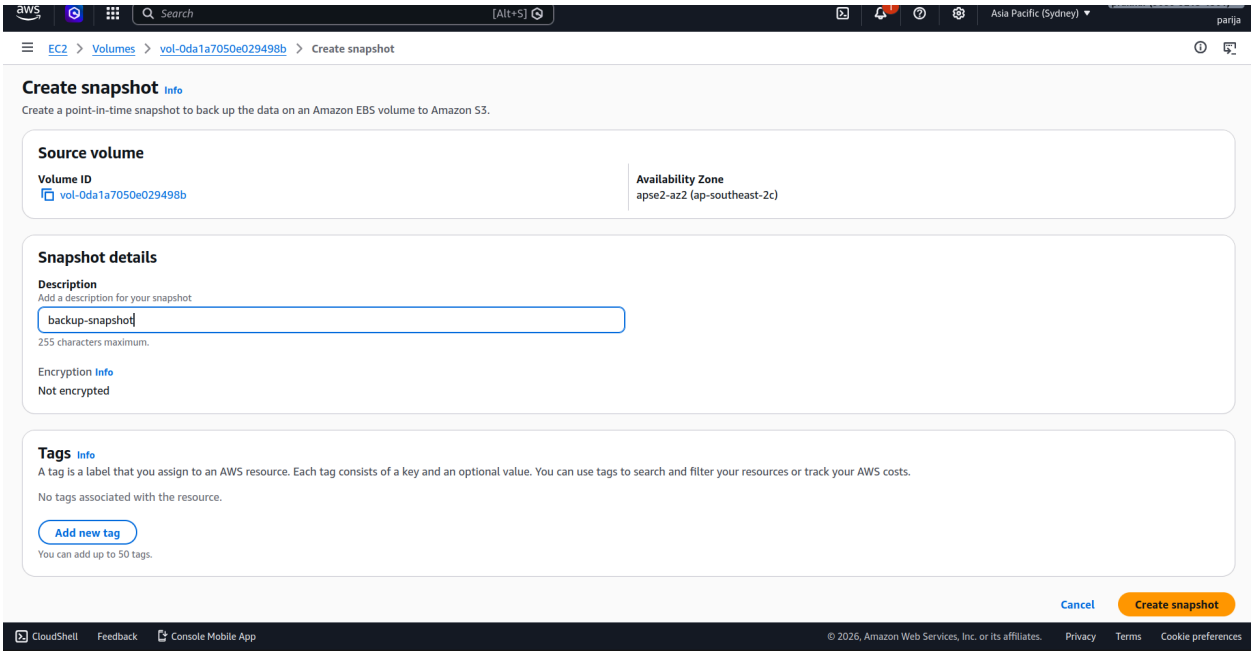
Step 1: Create EC2 Instance

EC2 → Instances → Launch Instance

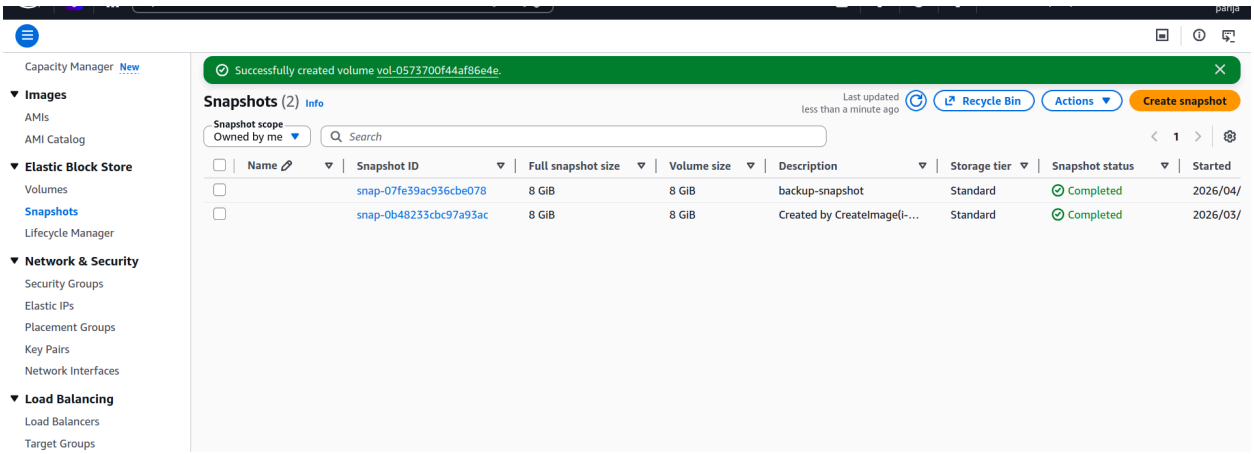
2. Create Files & Directories



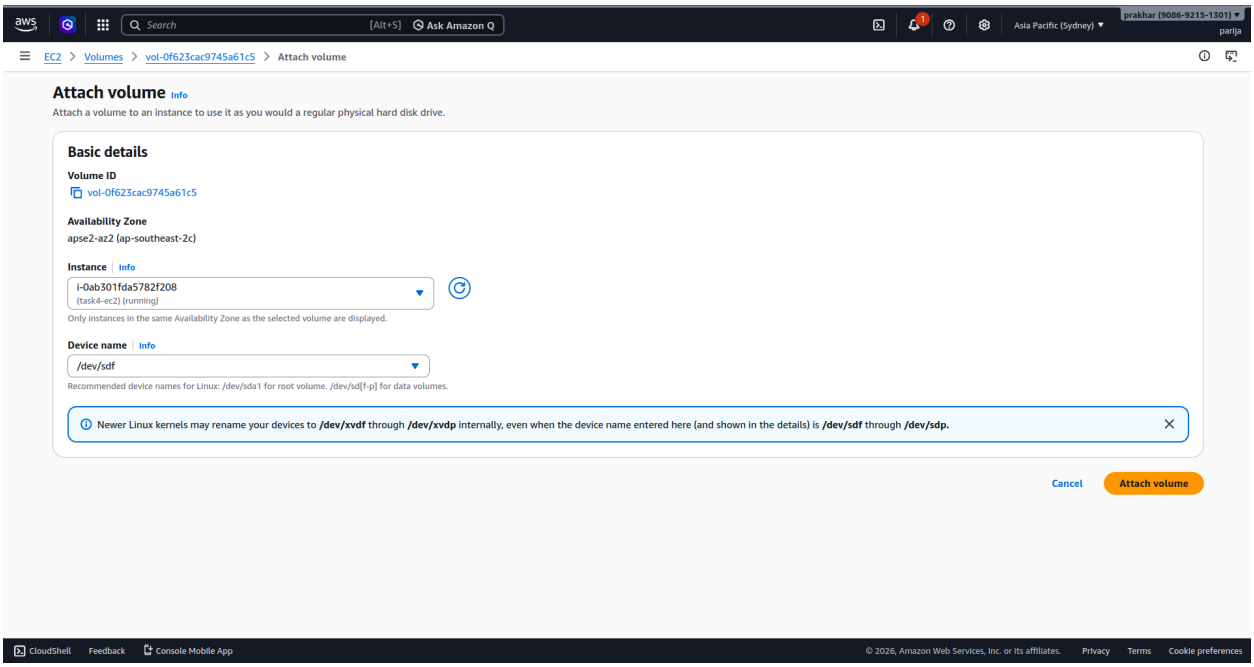
Step 3. Create Snapshot of EBS Volume

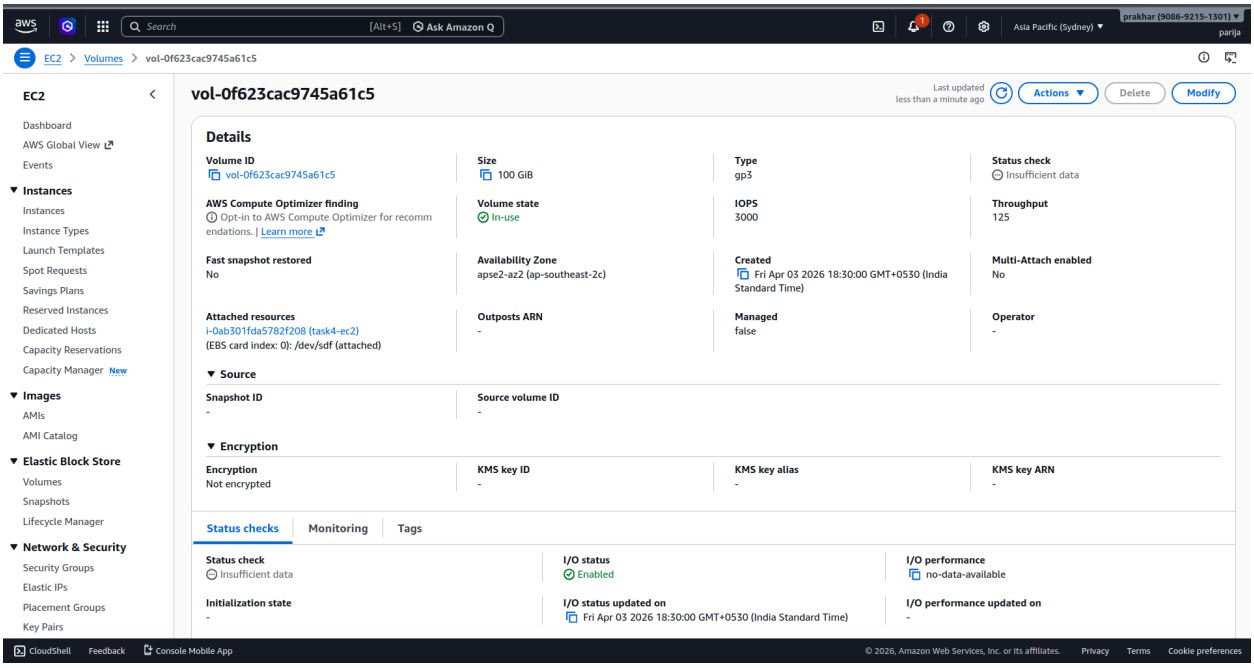


Step 4 :Create New EBS Volume from Snapshot



Step 5: Attach New Volume to EC2





Step 6 Mount and verify data

```
loop1
     squash 4.0                                                          0   100% /snap/core22/2339
loop2
     squash 4.0                                                          0   100% /snap/snapd/25935
